WEDNESDAY, APRIL 3RD

Join us as we taste some of the world’s oldest GRAPES!

Georgia Wine Pairing Dinner
With an Introduction by UofT Professor Dr. Stephen Batiuk

5:30pm—Reception with Dinner to Follow

Wine is one of the most commonly enjoyed and alcoholic beverages in the modern world. But what is the antiquity and history of this otherworldly drink? When and how was it first developed? How did it spread from its point of origin?

Dr. Stephen Batiuk will show how new archaeological field work and bio-molecular chemistry and genetics are helping unlock this story, pushing its origins back to the Neolithic period and to the region of Caucasia, modern Georgia, Armenia and Azerbaijan, and how one of our earliest and best documented examples of an ancient migration probably led to the spread of wine and wine culture across the Ancient Near East, and then eventually across the rest of the Mediterranean World.

PLEASE JOIN US FOR THIS WONDERFUL WINE & FOOD EXPERIENCE!
